

1) Which field of the Customers table is the primary key?

-> The primary key for the Customers table is the Cnum field.

2) What is the 4th column of the Customers table?

-> The fourth column is Rating.

3) What is another word for row? For column?

-> For row => Tuple, Entity, Opportunity, etc.

For column => Attribute, Key, Method, etc.

4) Why isn't it possible to see the first five rows of a table?

-> In a DBMS, tables is not a file every row is a file. Inside the table, the rows are not stored in sequentially, rows inside a table are scattered all over the database server hard-disk that's why Its not possible to see the first five rows of a table.
